## Grab companies from Yandex Taxi website

### Desktop Software Development

Posted 28 days ago

🔒 Specialized profiles can help you better highlight your expertise when submitting proposals to jobs like these. [Create a specialized profile.](#)

Here is Yandex Taxi website: <https://driver.yandex/ru-ru/base/parks>

At this page you can see list of companies, we have to grab them to CSV file with all the data provided: Company name, Phone, Email, City, Address, Working time

Main problem here is next: this page always return list of companies for your current region only.

So script should go over all possible regions on that page (<https://monosnap.com/file/ybFvMiCP1j3ApUeMZJeJvuniRPRLy04>) and save all companies from all regions to one file.

Implementation is possible as .NET console application (Mono) or simple PHP script.

**\$50**

Fixed-price

**\$**
