Ezpark Technology is looking for developers

Mobile App Development Invite-Only

Renewed 1 month ago

🔒 Specialized profiles can help you better highlight your expertise when submitting proposals to jobs like these. [Create a specialized profile.](#)

Ezpark Technology is looking for developers for the following projects: -

1. Customization and rebranding of our current mobile application. You can visit the website - www.ezpark.ae for more description on the application.
2. We also want to develop the web application which would be a replica of the mobile app
3. Admin Panel must be customized as per the requirements
4. A new mobile app called Towing app has to be developed
5. Wireless sensor integration with the mobile app (Sample API will be shared)

Please find the links to the apps below:

- Ezpark Android App: <https://play.google.com/store/apps/details?id=com.ezparkapp.ezpark>
- Ezpark iOS App: <https://apps.apple.com/us/app/ezpark-shared-parking/id1449009586?ls=1>

In case you can't find the apps on the stores, you will need to change the store location to United Arab Emirates as the apps are currently only available in UAE.

Once you have gone through the application, we will have a call with the interested parties to explain in detail the current application and the new applications. We are on a strict timeline, hence would require only serious candidates/companies to contact us.

In terms of deliverable to finalize the vendor, we need the following information: -

1. A detailed Quotation with Timeline
2. Work Breakdown Structure
3. List of platforms, technology capabilities and project team experience such as Java, HTML5, Mobile Platform etc.
4. Platform features, benefits, features and lifecycle, project release plan etc.
5. Complete high-level design & architecture of the software solutions with all their sub-components, modules, data flows etc.
6. Proposed programming methodology, app architecture & framework, app development technologies / languages, details of a three-tier architecture and devops tool to be used
7. The proposed architecture should align with enterprise architecture TOGAF and with modelling standards, archimate, BPMN, UML...
8. Product road map - proposed product roadmap during the project lifetime including maintenance phase
