

## Client-Side Development

For front-end / presentation layer development:

<a href="#">Bulma</a>	<a href="#">Skeleton</a>	<a href="#">Braintree Client SDK</a>
<a href="#">SASS</a>	<a href="#">Normalize.css</a>	
<a href="#">CSS</a>		<a href="#">JavaScript</a>

and / or

<a href="#">Bootstrap</a>				
<a href="#">SCSS</a>	<a href="#">Normalize.css</a>	<a href="#">HTML</a>	<a href="#">jQuery</a>	<a href="#">Popper.js</a>
<a href="#">CSS</a>			<a href="#">JavaScript</a>	

and / or

<a href="#">UIKit / Metro UI</a>		
<a href="#">LESS / SCSS</a>	<a href="#">HTML</a>	<a href="#">JavaScript</a>
<a href="#">CSS</a>		

and / or

<a href="#">Semantic UI</a>			
<a href="#">LESS</a>	<a href="#">Normalize.css</a>	<a href="#">HTML</a>	<a href="#">jQuery</a>
<a href="#">CSS</a>			<a href="#">JavaScript</a>

and / or

<a href="#">Kendo UI Core</a> / <a href="#">Kendo UI for jQuery</a> ( <a href="#">Kendo UI Professional</a> )		
<a href="#">LESS</a>	<a href="#">HTML</a>	<a href="#">jQuery</a>
<a href="#">CSS</a>		<a href="#">JavaScript</a>

or

<a href="#">Angular Material</a> / <a href="#">Kendo UI for Angular</a> ( <a href="#">Kendo UI Professional</a> )		
<a href="#">SCSS</a>	<a href="#">Angular</a>	
<a href="#">CSS</a>	<a href="#">HTML</a>	<a href="#">TypeScript</a>
		<a href="#">JavaScript</a>

Angular consuming services from the back-end / via the Web API (s. Server-Side Development).
